How to build a plate that keeps you full

A guide for main meals: no counting, just look at your plate.

- ½ **Vegetables and fruit** – the more colourful the better. Raw, roasted or in a soup.
- ¼ **Protein** – eggs, quark, yoghurt, pulses, meat, fish or tofu. Keeps you full for longer.
- ¼ **Carbs** – oats, wholegrain bread, potatoes, rice or quinoa. Gives you energy.
- \+ **A little fat** – a few nuts, a spoon of olive oil or a piece of cheese.

A rough guide for healthy adults. Not medical advice.

Tips from Tečka

1. Prep ahead. Put the oats in a bowl and chop the veg in the evening, and breakfast takes five minutes.
2. Keep fruit in sight. You eat what you see, so make it an apple, not biscuits.
3. Don't count every bite. It's enough if your plate looks roughly like the one in this booklet.
4. A sweet treat belongs in the plan. Date balls or quark with strawberries are a good start.
5. One bad day changes nothing. The next meal is a fresh start, no guilt.
